

**PREFACE: PROCEEDINGS OF THE INTEGERS CONFERENCE
2018**

The Editors

The “Integers Conference 2018” was held October 3-6, 2018 in Augusta, Georgia. The conference featured plenary talks presented by Fan Chung, Michael Filaseta, and Paul Pollack. There were a total of seventy talks given, covering a range of topics in number theory and combinatorics. This special volume of Integers consists of fifteen refereed articles, which are expanded and revised versions of talks presented at the conference. The conference was made possible with the generous support of the National Science Foundation and Augusta University.
